Learn more about common reasons for starting a visit and how 98point6® can help.

## Upper Respiratory Infections

- Includes colds, coughs and nasal infections caused by more than 200 different viruses
- Can last for more than one week, especially in children, the elderly and those with pre-existing conditions

**They Can Help:** Manage your symptoms and provide guidance on concerns to look out for

## Hypertension

- Preventable, but often lacking clear symptoms
- Regular blood pressure screenings can help identify potential concerns

**They Can Help:** Confirm diagnosis and start treatment, which may include identifying lifestyle changes to prevent and manage the condition

## Asthma

- The most common chronic condition found in children and the #1 reason for missed school days
- Affects 1 in 12 school-aged children in the U.S.

**They Can Help:** Assess the severity and prescribe both rescue and maintenance medications

## Urinary Tract Infections (UTI)

- Occur when bacteria enters and infects the urinary tract and can travel up to the kidneys
- Can cause more serious problems if not treated promptly

**They Can Help:** Provide a personalized treatment plan, including testing if needed

## Anxiety

- Behavioral health conditions, such as anxiety, are highly treatable, and on the rise
- Only 37% of those affected receive treatment

**They Can Help:** Assess the severity and explore both behavioral management techniques and possible medications

From COVID-19 to hypertension concerns, the road to complete and confident long-term well-being starts with primary care. Convenient and affordable, 98point6® makes it easy for Banner|Aetna members to get on-demand access to diagnosis and treatment that fits into your busy life—so you can feel your best every day.

You should always call 9-1-1 for medical emergencies. A medical emergency is an event that you reasonably believe threatens you or someone else's life or limb in such a manner that immediate medical care is needed to prevent death or serious impairment of health. A medical emergency includes severe pain, bad injury, a serious illness, or a medical condition that is quickly getting much worse.
